Art Unit: 3617

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hundt. Hundt discloses the claimed structure (note Figure 5, for example) including a waterproof compartment with a main compartment with inner and outer rims, a lid 14 having a skirt with threads 38, and a seal 60.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hundt in view of Ganz, Jr. et al. Hundt does not disclose a seal with ribs. Ganz, Jr. et al teach a seal with ribs (at 18). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the seal of Hundt with ribs as taught by Ganz, Jr. et al for improved sealing.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hundt in view of Ray. Hundt does not disclose a J seal. Ray teaches a J seal. It would have been obvious to a person of ordinary skill in the art at the time the invention was made

Art Unit: 3617

to form the seal of Hundt as a J seal for low cost and improved alignment as taught by Ray.

6. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hundt in view of Limonard. Hundt does not disclose a lateral compartment. Limonard teaches a lateral compartment 15. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Hundt with a lateral compartment for improved range of use as taught by Limonard.

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hundt in view of Limonard, as applied to claims 6-9, and further in view of Kraft. Hundt does not disclose a pin. Kraft teaches a pin 42. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Hundt with a pin for improved strength of attachment as taught by Kraft.

8. Claim 11 is allowed.
